# Coming October 1: 2024 ICD-10 Diagnosis Changes

This time of year can be stressful for providers and coders. It is a time when we're on the lookout for notifications about ICD-10 code updates. Each year, the volume of these changes appears to increase. Although we are still awaiting details on the impending adjustments to CPT (Current Procedural Terminology) codes for 2024, we have already received notifications regarding the ICD-10 changes from CMS. The substantial modifications comprise 395 new codes, 25 deletions, 13 revisions, and updates to the addendum, tabular, code tables, and index.

So what is changing? Here is a brief overview:

- 24 new codes added to the diseases of the nervous system (G00-G99) chapter
- 34 new codes added to the diseases of the eye and adnexa (H00-H59) chapter
- 36 new codes added to the diseases of the musculoskeletal system and connective tissue (M00-M99) chapter
- 22 new codes added and six revised in the congenital malformations, deformations, and chromosomal abnormalities (Q00-Q99) chapter
- 30 new codes added to and six invalidated from the factors influencing health status and contact with health services (Z00-Z99) chapter

We'll go into more detail in subsequent editions of Coffee & Coding. For now, let's start with the G and H chapters.
